Please note: Conestoga College collects data on hourly wages of co-operative education students. The figures in the table above are not earnings established by the Co-op & Career Services Office but represent a compilation of the ranges of earnings for co-op students up to August 2011. Our experience has been that employers increase wages as skills increase, particularly when employing students for subsequent work terms (II, III and IV) and during internships. The Co-op & Career Services Office can provide assistance to employers in establishing appropriate wage rates.
